

Tomatoes

PRODUCT BENEFITS IN DETAIL:

The use of Seasol Commercial results in significant improvement of both plant health and crop development resulting in:

- **Improved plant establishment.** By stimulating root growth needed for rapid establishment after planting.
- **Drought/heat tolerance.** Seasol significantly increases drought tolerance by increasing the innate capacity of plants to resist water loss.
- **Cold tolerance.** The same mechanism that protects against drought stress, also provides significant frost protection by reducing the temperature at which cells freeze.
- **Disease resistance.** It has been consistently reported that Seasol treated plants demonstrate reduced incidence and severity of various disease impacts.
- **Increased microbial activity.** Seasol is a food source for beneficial microbes, increasing their number and diversity.

TOMATO APPLICATION RATES AND TIMING

Stage	Rates	Notes
Initial soil preparation	Trilogy 631 10L/Ha	Soil application prior to bed forming or final seed-bed preparation
Immediately after sowing or transplanting	Seasol Commercial 5-10Lt/Ha	Soil application via boom spray or irrigation
As the first flower clusters begin to develop	Seasol Commercial 5-10Lt/Ha	Apply as a foliar spray with full coverage or via fertigation.
Every 10 to 14 days	Seasol Commercial 5Lt/Ha	

WHERE DOES SEASOL COMMERCIAL FIT INTO TOMATO PRODUCTION?

- Seasol Commercial can be used every 2-4 weeks during the growing season as a general plant tonic to enhance plant health, flowering and fruit production.
- Seasol Commercial can be applied as needed to provide increased resistance against frost and heat damage.
- Seasol Commercial is a valuable supplement to apply before, or with, any foliar applied nutrients to enhance their uptake and utilisation.

Tomatoes

ABOUT SEASOL COMMERCIAL

Seasol Commercial is a 100% liquid seaweed plant conditioner that provides a synergistic range of natural compounds, trace elements, alginates and carbohydrates from a blend of brown kelps. **Seasol Commercial** promotes root growth, and improves plant tolerance to environmental and climatic stress. By promoting root growth, **Seasol Commercial** also has the effect of enhancing fertiliser efficiency.

Seasol Commercial is made from *Durvillaea potatorum* and *Ascophyllum nodosum*. *Durvillaea potatorum* is sourced from King Island and the west coast of Tasmania where the kelp is swept ashore after storms. Collection of storm cast kelp is sustainably managed under licenses issued by the Tasmanian Government. *Ascophyllum nodosum* is widely used in the northern hemisphere where it is sustainably harvested from managed kelp beds. The kelps are blended together in our own dedicated processing facility near Launceston to produce the wonderful seaweed solution that is **Seasol Commercial**.

ABOUT TRILOGY 631

Trilogy 631 is a unique blend of three refined natural soil & plant beneficial compounds. Seasol (Kelp), PowerFish (Fish extract) and Organic Humate.

Trilogy 631 enhances plant and root growth, supplying the soil carbon and nitrogen cycle, supplying plants with amino acids, leaves the soil with Soil Organic Matter, and converting more sunlight.
